

EXHIBIT H

Continued

Carson City Charger Information:

Please find the installation materials attached for review and inclusion in the bid documents as necessary. My contact information is below for inclusion as well.

As a reminder, the charger will need to be properly installed per the checklist and manuals (attached). Please ensure that you do not energize the EVSE before **Nuvve** receives and approves the checklist and pictures.

Next, **Nuvve** and **Rhombus** will review and revert with any corrections on the checklist and pictures. After the corrections are made, if any, and the checklist is approved, **Rhombus** will schedule an FSR to visit the site for final commissioning efforts.

As a reminder, it is paramount that the EV be on-site before scheduling the **Rhombus** FSR to be on-site.

You can access these docs and others here: <https://nuvve.com/partner-portal/>

Password: **Greener_EVs**

The checklist approval process can take up to two weeks.
